

Statement:

I am interested in challenging, complex projects to support public organizations, data collection, community engagement and greater information transparency. I am very interested in working with groups that are mission-driven, and are ultimately involved in supporting a fair and just society. I am interested in growing in the field of business intelligence, data visualization, and knowledge products that better tell an underlying story, engage with users, and trigger action.

Core Competencies:

- Experienced project lead - systems integrator - communicative - patient
- Strategic integration - interested in aligning needs of client, partners, internal team, technology resources, and policy/content managers in order to drive a successful outcome
- Product manager - functional specifications, database architecture, wireframe, rapid deployment, and analytics to report back and improve
- Full stack developer - agile / scrum methodology
- Advisor - technical advice to non-technical people for new projects
- Co-founder - launched multiple startup websites, sold one project

Typical Day:

My routine typically includes

- A) deep discussion re: a client's requests
- B) strategic analysis and specifying functionality: identifying what can be done in the universe of available solutions, for what budget
- C) rapid implementation / wireframing / database architecture / MVP creation
- D) presenting results, quantifying deliverables, understanding how to better support customer
- E) coordinating with various stakeholders around training, integration, and efficient use

Career Highlights:

- I was part of the team that delivered a Drupal 7 redesign for changemakers.com, which reaches 90,000 monthly users in the field of global social enterprise and has disbursed \$600 million in funds.
- As principal producer and manager, I delivered 240 websites over 10 years of working with public agencies, membership groups, and businesses to move their web properties online.
- As a founder, I built and sold a blog for success-oriented women. As a co-founder, I acted as CTO and launched an e-commerce store for luxury home & fashion accessories.
- I helped manage a \$750k project to evaluate all community-based organizations serving children, youth, and families that were funded by the City and County of San Francisco.
- I helped launch the Odyssey Internet Treks by leading a pilot Mexico visit, then traveling worldwide for 18 months to augment California educational curriculum with digital resources.
- I've written three trade books on building community through website engagement strategies. I also blog, post articles, and am invited to speak on panels, videos, and podcasts.

OVERVIEW

- + **Mission:** to build community, foster connectedness, use tech skills to create a better world.
- + **Unique skill:** translating business process needs into effective solutions, builds solutions to solve pressing problems.
- + **Turns ideas into reality:** clarifies needs, develops plans, tests assumptions, implements production
- + **Drives progress:** understands goals, coordinates efforts, tracks schedule, documents
- + **Focuses communication:** facilitates team-building & intercultural/interpersonal abilities
- + **Aims for sustainability:** cognizant of triple bottom line

PRIMARY EXPERIENCE

Lead Product Manager, Drupal Web Developer Ashoka Changemakers

Arlington, VA, Feb 2014 - present

Participated and led team that delivered a redesign and refactoring of a Drupal 7 site over 12 months, cutting 80% of custom code and converting to standardized content types and views. Implemented scrum to roll out feature requests for changemakers.com, where our team consists of 3 engineers and supports an overall team of ~40 coordinators, project managers, operations staff, & executive leaders.

- Identified functional specifications, evaluated potential solutions, installed/wireframed/themed minimum viable products, prototyped new solutions
- Created custom views and content types and new features to support clients
- Developed reports, documentation, and training for multiple levels of users
- Identified and built out new revenue-generating pilots
- Served as team lead for web team and participated in conversion to Drupal 7
- Worked with tech team (4 engineers) to support an overall team of 40 project managers, operations staff, and executive leaders
- Third-party integrations and workflow Tools: agile methodology, Analytics (90,000 monthly users), Slack, Jira/Fisheye, Confluence, SequelPro, drush, Sublime, Git, TeamworkPM, Skype, Google Hangouts, PHP/MySQL, Google Drive, Google Docs, UXPin, LucidChart, Salesforce, Pantheon
- Starting January 2015 I have begun consulting with internal and external partners to build business intelligence tools such as a conference application for Ashoka U, a pilot website for our Africa region, and a searchable directory of leading changemakers for our Latin America, US, and European teams

Consultant, Drupal Web Developer 10K Webdesign

Hawaii & California, July 2004 - present

I served as primary coder/producer on 240+ websites, doing client outreach, project management, and reporting, on web properties for clients like the Castro Valley Sanitary District: government \$7m, West Contra Costa Integrated Waste Management Authority: public agency \$1m, The Sperm Bank of California: nonprofit \$1.2m, Molokai Community Health Center: health clinic \$3m, SOCCOM Princeton: research institute \$24m.

- Worked with clients to determine business process and needs
- Scoped projects, listed deliverables, defined specifications, assessed user roles
- Advised clients on using digital properties to support goals (revenue, signups, conversions)
- Identified processes, developed standard operating procedures, streamlined workflow
- Implemented Drupal and PHP/MySQL content management systems
- Provided all programming and theme development on 240+ projects
- Trained and installed search engine optimization tools

- Managed project milestones, kept team on track
- Led teams (virtual and in-person designers, developers, content editors, SEO managers)
- Third-party integrations with: Facebook API (Login, Like Box), Twitter API, Constant Contact, Vertical Response, MailChimp, Salesforce, Wild Apricot, Google Maps API, Google Analytics, QuantCast, CiviCRM, PCI, Authorize.net, PayPal, SSL, AJAX, JQuery, PEAR, AddThis, CK Editor, TinyMCE, Vimeo, YouTube, vCard, Sitemaps, RSS, Google, Amazon Catalog Search
- I also incubated, co-founded, and advised 8 other endeavors that ended in #failingforward

Policy Analyst

JMPT Consulting Inc.

San Francisco, August 2001 - July 2004

Part of team that delivered a large-scale evaluation of a department for City & County of San Francisco.

- Project managed an 18 month outcomes-based evaluation, strategic planning, and technology project for San Francisco County Department of Children, Youth & Their Families
- Supported 100+ community-based organizations, 35 subcontractors, 3 partners
- Trained field coordinators on processes and procedures
- Conducted qualitative/quantitative evaluations based on focus groups & site visits
