

Greetings,

I'm interested in challenging, complex projects that support social enterprise, women, education, and sustainable living. I work with mission-driven organizations to support a fair and just society. I first learned how to code in 1999, launched my web consulting practice in 2004, and have been continuously working to build products and services that make a positive difference. I have a well-established network of designers and developers to support large scale redesign or refactoring work. Core competencies:

- **advisor** - technical advice to non-technical people for new projects, sold one project
- **director of digital products** - develops roadmap and shares workflow for creating new digital products
- **strategic integrator** - understands and aligns needs of client, partners, internal team, technology resource people and products, and policy/content managers in order to support a successful outcome
- **engineering manager** - manages workflow for groups of 5-10
- **data architect** - responsible for database requirements (in conjunction with client), user pathways, database design, optimization, and modeling, and "big-picture" thinking about how client requests convert to actionable items from engineering team
- **project lead** - communicative, patient, timeline-oriented, manages teams, leads scrums
- **product manager** - functional specifications, wireframes, user pathways, analytics and reports
- **full stack developer** - PHP/mysql since 2001, Drupal since 2008, Agile/scrum since 2012

My routine typically includes

- A) deep discussion re: client's requests, as well as explaining/understanding client / organizational needs
- B) specifying functionality and architecture: clarifying what can be done and suggesting solutions
- C) managing: directing flow of scrums, specifying tickets, reviewing work, sign-off on incremental builds
- D) producing: implementation / wireframing / database architecture / MVP creation
- E) communicating: presenting results, sharing analytics, supporting team and clients

Career highlights:

- June 2016 - May 2017: Development director for redesign of GreenAmerica.org (\$215k Drupal 8)
- January 2016 - April 2016: Database architect and engineering lead for redesign of GistNetwork.org, a US Department of State-funded international entrepreneurship challenge (\$310k Drupal 7)
- May 2014 - November 2015: Drupal 7 redesign for changemakers.com, 85,000 monthly users in the field of global social enterprise (\$180k Drupal 7)
- 2004-2014: Principal producer, delivered 240+ websites over 10+ years of working with public agencies, membership groups, and businesses (Drupal 6 and 7)
- 2012: As a founder, I built and sold a blog for success-oriented women
- 2010: As a co-founder, I launched an e-commerce store for home & fashion accessories
- 2000: Policy analyst as part of a project to evaluate all community-based organizations serving children, youth, families for the City and County of San Francisco (\$750k)
- 2001: I was part of the core team that launched the Odyssey Internet Treks by leading a pilot Mexico visit, traveling to 35 countries for 18 months, and creating educational content online
- I've written three trade books on building community through website engagement strategies, and I also blog, post articles, and speak on panels, videos, and podcasts

I am always interested in connecting over current needs, supporting existing projects, and advising people who are working to create a socially just, environmentally sustainable, equitable society that takes care of women, children, families, and the next generations.

OVERVIEW

- + **Mission:** to build community, foster connectedness, & use my tech skills to create a better world
- + **Unique skill:** translating business process needs into effective solutions, building solutions to solve pressing problems, communicating with teams to drive long-term initiatives
- + **Turns ideas into reality:** clarifies needs, develops plans, tests assumptions, implements production
- + **Drives progress:** understands goals, coordinates efforts, tracks schedules, explains documents

DIGITAL PRODUCT DEVELOPMENT EXPERIENCE
